Career Objective

Detail-oriented data professional with hands-on experience in Python, SQL, and Power BI, with completed training at Dr. Reddy's Foundation. Seeking to apply data analysis, cloud fundamentals, and problem-solving skills to contribute effectively in a growth-oriented organization. Passionate about transforming data into meaningful insights and supporting data-driven business decisions.

EDUCATION

Visvesvaraya Technological University	Dec 2025
Master of Computer Applications	Bangalore, Karnataka
Sharnbasva University	Jul 2023
Bachelor of Computer Applications	Kalaburagi, Karnataka

EXPERIENCE

Data Analyst

Dr. Reddy's Foundation

- Analyzing organizational and program-related data using Python and SQL to support data-driven decision-making.
- Cleaning, transforming, and validating datasets to ensure data accuracy and consistency.
- Creating dashboards and reports to track KPIs, trends, and performance metrics.
- Collaborating with teammates to deliver insights that improve operational efficiency and reporting.

PROJECTS

MoneyMap – Data-Driven Personal Finance Analytics System

- Developed a data-centric personal finance analytics system using Pandas and NumPy to analyze and track data.
- Transformed transactional data from CSV files and user inputs, preparing reliable datasets for financial analysis.
- Linear Regression-based savings forecasting model to predict future financial trends and support data-driven planning.
- Generated actionable financial insights and interactive dashboards to analyze spending patterns, budget utilization, and savings trends.

Banking Fraud Analytics — PostgreSQL, Power BI, Python

- Designed a PostgreSQL banking fraud analytics database to manage customer, transaction and fraud-related data.
- Developed SQL queries using CTEs, window functions, and CASE statements to identify suspicious transaction patterns.
- Developed SQL-based fraud detection rules to identify rapid transactions, and suspicious device activity.
- Built PostgreSQL reporting views and connected them to Power BI to analyze transactions, fraud risks, alerts, and account-level fraud activity.

TECHNICAL SKILLS

Programming Languages : Python

Query Language: SQL

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation

Tools & Technologies: Excel, Power BI,Power Automate, AWS (EC2, S3)

Business Intelligence: Power BI, DAX, Power Query, Data Visualization, Dashboard Development, Data Modeling

CERTIFICATIONS

TCS YEP 90 hours Training (Concluded : May, 2024)

Naukari Campus Young Turks (Completed : Oct, 2024)

NPTEL certificate in java programming (Concluded: Oct, 2022)

SOFT SKILLS

Languages : English, Kannada, Hindi

- Effective Communication
- Analytical Thinking
- Leadership & Facilitation
- Problem-Solving
- Adaptability
- Willingness to learn new tech
